

What to Pack

Whilst you stay with us, we want you to feel as comfortable as possible. Please see the lists below for what you should pack and what you should not pack. If you do bring any non-essentials, please remember that the university is not responsible for the loss or damage of any of your belongings (so maybe don't put that Xbox in the communal sitting area) and that you are liable for any damages to your room, as per the conditions in your tenancy agreement.

- ✗ Deep fat fryers
- ✗ Gas heaters
- ✗ Drones
- ✗ Explosives
- ✗ Illegal substances
- ✗ Real weapons

Portable Appliance Testing (PAT Testing)

Portable Appliance Testing (PAT) is undertaken every year by UHI and involves testing all items that have a standard 3-pin plug. This is undertaken towards the start of the calendar year so as to include any new electrical items that residents may be given for Christmas. The UHI Accommodation team will contact all residents to arrange testing. Residents should undertake a simple user check before using all electrical equipment to ensure that it is free from damage or signs of deterioration. Such items should be taken out of use immediately as they may be unsafe to use. Faults with any electrical or other equipment provided by UHI should be reported to the Accommodation team as soon as possible.

Further information on electrical equipment can be found here: [*Maintaining portable electrical equipment in low-risk environments \(INDG236\(rev2\)\) \(hse.gov.uk\)*](#)
